Projects

Name : University Management System

Link: <http://gurukashiuniversity.co.in/lms/>

Project Overview:

University management system is a group of modules i.e. Lab management system, Gate entry Module, Electricity Bill Generation, Question Paper Generation, Hostel Allotment Module and Access Rights Management System.

- Lab Management System (LMS) is a software that keeps track of all devices. Each and every device has a QR code with a unique article number. By scanning that QR code many operations can be performed on that device like assigning to user, Updation of device details, raise a complaint of faulty device etc.
- Electricity Bill Generation is a smartest way to generate bills at the month end. Every meter has a QR code that can be scanned to update meter reading and bill generation.
- Gate Entry Module keeps record of visitors coming to the university.
- Access Rights Management System is a permission system that allows administrator to define rules that will control operations on the data, processing, and user interface of the software. These rules have relations with the users and roles.

Platform: PHP, JavaScript, Ajax, Git, jQuery

Responsibilities:

- Responsible for development, designing, testing, and implementing of admin applications.
- Design and development of various components.
- Integration of Server-side services to client side.
- Managed third-party integrations like Instascan etc.

Name : Archery Championship Registration

Link: <https://gurukashiuniversity.in/archery/>

Project Overview:

Archery championship registration is a registration portal developed for the smooth conduct of All India Inter University Archery Championship 2022-23. This is the first time that the entire record has been kept digital. 1805 Players and 283 Managers/Coaches from 177 universities have been registered.

Platform: PHP, JavaScript, Ajax, Git, jQuery

Responsibilities:

- Troubleshoot and resolved bugs in the portal.
- Implemented changes and updates according to requirements.
- Monitored and addressed any recurring issues to ensure the stability and performance of the software.
- Tested and debugged the application to ensure it was fully functional and user-friendly.
